HANDLING PRECAUTIONS

PLASTIC COVER / DIFFUSER

To avoid permanent damage, do not allow small or sharp objects to apply pressure on to the plastic cover / diffuser.

IMPACT PROTECTION

The product is not vandal resistant. Never stand or place weighted items on the product. This product has a maximum IK rating of IK08.

POWER CABLES

The product end caps, power cables and connectors must not be pulled or twisted. Never pull the product by its power cables or hang it from its power cables or connectors.

CUTTING AND SAWING

The product must not be sawn, drilled or otherwise modified in any way.

DAMAGES

Inspect the product. If you see any damage upon unpacking, report to LUMINO immediately and do not install the product.

LOCATION

Suitable for damp locations. IP64 rated product is dust tight and protected against water splashes.

Protect product from dust, paint and harmful substances during installation and use. Ensure product is not exposed to VOC gases. Do not obstruct the product and its light output.

SAFETY GUIDANCE

WIRING GUIDE

Follow the guidance shown in the provided wiring guide, including maximum cable lengths, cable sizes and other wiring instructions. When running cables through an enclosure, ensure cables are protected from damage, separated from mains voltage cables and anchored against being pulled. Make connections appropriate for the IP rating of the product.

QUALIFIED INSTALLER

Installation must be carried out by a qualified person and conducted in accordance with local regulations and applicable standards.

THERMAL MANAGEMENT

Ensure ambient temperature (T_a) does not exceed 40°C (104°F) and case temperature (T_c) does not exceed 70°C (158°F). Exceeding maximum T_c will cause permanent damage and void the product warranty.

Allow sufficient clear air space for the LED drivers, as well as suitable access to the drivers as specified on installation instructions.

REPAIR AND REPLACEMENT

If the product is not functioning, contact LUMINO to register a Service Call for factory repair or replacement. Light source is not user replaceable. See page 5 for Ecodesign and end of life information.

DRIVERS

POWER OFF

Product and driver must not be live wired. Switch off power before work begins. Follow instructions and guidance for the make and model of driver being used.

24VDC SELV

Only use drivers with a maximum output of 24VDC. Drivers must be SELV, constant voltage with both overload and short-circuit protection.

DIMMERS

Check dimmer is compatible with the driver and certified to local regulations.

INRUSH CURRENT

Many constant voltage LED drivers can have high inrush current at power-on. Driver's inrush current can be many times the normal operating current. Use a suitable MCB. Type C MCBs are normally suitable but if inrush current is a persistent problem an inrush suppressor may be required.

PROTECTION

Use only with 24VDC Class 2 power unit to UL1310 standard with overload and short-circuit protection. Rate drivers for at least 10% above load. Driver protection circuitry must not be relied upon to protect secondary 24VDC electrical circuits from damage caused by over-current or short circuit. DC fuses or DC electronic circuit breakers are recommended for full protection. Allow for access to drivers for maintenance and sufficient clear air space for ventilation.

CABLING

Do not overload the driver. Damage will be caused by incorrect input voltage, reverse polarity or short circuit. Plan for loads, driver locations, dimming and cabling prior to start of work. Ensure basic insulation is maintained between mains and dimming control wires.

ACCESSORIES

Cable & Connector

VECA-CA0250—MF-R1
2 / 3 / 4 / 5 Pole power link
250mm cable length

VECA-CA1000—MF-R1
2 / 3 / 4 / 5 Pole power link
1000mm cable length

IDC Connector

VECA-CA90—R1
Sealant connector.
1 - 3A Max / 3 - 5A Max. Pair

Self-Closing Cable Sleeve

VECA-SL001-R1
1m cable sleeving

Easy Mount

V36S-MS402-R1
Mounting clips
1 pair per luminaire

Stealth Mount

V36S-MS501-R1
Hidden fixing clip
Allow 3 clips per metre

Rotation Mount

V36S-MS601-R1
Rotation mount
Allow 2 clips per metre

INSTALLATION

1. Plan Installation

Check product and its dimensions against the planned installation. Runs of LEDs may have to be installed in a particular sequence.

105mm - 2005mm length

▲ ~1195g per metre

Rotation Mount

Easy Mount

Stealth Mount

2. Prepare Power Supply

This product requires a 24VDC power supply. Please refer to provided wiring guide document. Failure to follow guide may result in damage to the product and voiding of warranty.

3. Cable Exit

Plan cable entry and exit points before installing the product. Make a suitably sized hole for the cable/s to pass through, and position beneath where the product is planned to be placed.

4. Mounting Clips

Fix all the clips securely to the mounting surface. Recommended screw size is no greater than Ø4.00mm in diameter. Use fixings suitable for the material being fixed into.

Products should be held with equally spaced clips (see accessories for quantity per metre). Products shorter than 505mm may be held by just 2 clips. There must always be a clip within 100mm to 200mm of each end of the product.

5. Connect to LED Driver

With the power off. Feed the power cables to the V36S, connecting the product to the LED driver. Finalise all electrical connections and test the circuit. If the product does not function as expected, turn power off immediately and check all connections.

6. Mount Product

Align clips and carefully push the product into the clips. Ensure the product is fully clipped in place and check it is not misaligned or misplaced due to screw heads or wires. Ensure that cables are not pinched when installed.

7. Protect exposed cable

Self-closing cable sleeving: VECA-SL001-R1

For outdoor applications, the power cable must be wrapped in cable sleeving to protect the cable from UV exposure. Trim sleeving to match cable length.

EASY MOUNT INSTALLATION

V36S-MS402-R1

1. Plan Out Installation

Easy mount fixing orientation should be installed as shown.

2. Measure and Drill Holes

Plan fixing hole positions, drill pilot holes and cable entry/exit holes as required.

Make a suitably sized hole for the cable/s to pass through, and position beneath where the product is planned to be placed.

! Easy mounts spaced 50mm from each end of the luminaire.

3. Fix to Mounting Surface

Fix the easy mount to the fixing surface using a screw fixing appropriate for the mounting surface. Use a screw no bigger than $\varnothing 5\text{mm}$. Allow for easy mount to have some movement.

4. Install V36S

Fit V36S to the easy mounts, making sure not to pinch cables when installing.

5. Close Latch

Secure V36S to the easy mounts by closing the latch. Check that mounting is secure.

Removing V36S

To remove, use a plastic pry tool. Following steps 4 and 5 in reverse.

ROTATION MOUNT INSTALLATION

V36S-MS601-R1

1. Mount Positions

Adjust positions of the mounts against the V36S profile by spacing the mounts out as shown in the diagram, then tighten screws using the provided Allen key.

2. Mount the V36S

Fix the V36S to the mounting surface using a screw fixing appropriate for the mounting surface.

3. Adjust

Adjust the V36S to the desired position and lock of the angle of adjustment using the provided Allen key. Ensure that all adjustment screws are tightened.

LUMINO

ECODESIGN REGULATION

This product is considered to be a “containing product” in the sense of Regulations (EU) 2019/2020 and (EU) 2019/2015.

The contained light source is an integrated part of the containing product and its removal can only be done by causing permanent damage to the containing product.

Therefore, replacement of the light source with the use of commonly available tools is not justified due to its restricted mechanical, electrical, optical, thermal and/or environmental protection requirements.

DISMANTLING

Dismantling of light source from the containing product at end of life:

The containing product shall be cut to the length of the contained light source and the light source mechanically detached from the containing product. Containing product component parts shall then be disassembled.

Containing products shall be separated from building material and/or from other additional mounting accessories by means of a professional installer.

Separate control gear and light sources must be disposed of at certified disposal companies in accordance with Directive 2012/19/EU (WEEE) in the EU and with Waste Electrical and Electronic Equipment (WEEE) Regulations 2013 in the UK.

LUMINO is a member of the WEEE producer compliance scheme.
Registration number: WEE/MM8138AA

ENERGY RATING

This product contains light sources of energy efficiency classes as shown:

LED	CCT	9.6W/m	12W/m	24W/m	30W/m
